

dunbrik flues	Dunbrik 1581 silicone sealant	Product safety data sheet
<b>Description</b>	A blend of reactive silicone polymers and silane cross linking agents.	
<b>Physical properties</b>	Soft ready to use paste. Specific gravity 1.05 Solubility: Immiscible, insoluble Odour: Smell of acetic acid in the uncured state.	
<b>Handling &amp; storage</b>	Sealant releases acetic acid during application and cure. Use in well ventilated area to ensure concentration of acetic acid remains below TLV of 10 ppm. Use safety glasses when used in unventilated areas as this may cause eye irritation. Use gloves on all occasions as contact in uncured state may cause skin irritation.	
<b>Spillage &amp; leak procedure</b>	Scrape up bulk of material for disposal and wash walking surfaces with detergent and water to reduce slipping hazard.	
<b>Waste disposal</b>	Incinerate or landfill.	
<b>Fire and explosion</b>	Use all standard fire fighting media. No special hazard.	
<b>Labeling</b>	This product is not required to be labeled in a special manner according to the 1984 CPL Regulation.	
<b>Toxicity data</b>	Acute oral LD50-25,000 MG/KG (rat). This product or one of its ingredients present in excess of 0.1% is not listed as a carcinogen. When used in accordance with Dunbrik user instructions Dunbrik 1581 Silicone Sealant is not considered toxic or harmful.	
<b>Emergency and first aid procedure</b>		
<b>Skin contact</b>	Uncured product contact will irritate lips, gums and tongue and may irritate skin. Remove bulk from skin with dry cloth or paper towel before washing with detergent and water.	
<b>Eye contact</b>	Uncured product contact will irritate the eyes. Immediately flush eyes with plenty of water for at least 15 minutes and obtain the attention of an oculist if irritation persists.	
<b>Ingestion</b>	May be harmful if swallowed in sufficient quantities. Small quantities may cause discomfort, although practically non-toxic. Seek medical advice if irritation persists.	
<b>Inhalation</b>	Acetic Acid released from uncured product may cause moderate respiratory irritation and may also cause irritation of the mouth, nose and throat when used in unventilated area. Move person to fresh air for recovery.
