

dunbrik flues	Mini Clearflow Gas Flue Blocks	Product safety data sheet
<b>Description</b>	Pre-cast concrete flue components	
<b>Physical properties</b>	Blocks made from Portland cement, sand and admixture	
<b>Handling &amp; storage</b>	Manual handling should be avoided as far as is reasonably practical. An assessment should be made, taking into account the load, environment, task and the individual's capacity and training. Employ good lifting techniques. Storage should be on level ground. When stacked the components should be restrained from falling over. Remove products from the top of the pallet and avoid cutting the wrapping at the side.	
<b>Accidental release measures</b>	No environmental release danger.	
<b>Waste disposal</b>	Pre-cast concrete products should be disposed of at an approved solid waste disposal or landfill site in accordance with local authority guidance.	
<b>Fire and explosion</b>	Use all standard fire fighting media. No special hazard.	
<b>Personal protection</b>	Hand protection - Gloves (but these may reduce grip when manually handling) Foot protection - Steel toe capped shoes / boots	
<b>Hazard identification</b>	Non hazardous	
<b>Transport information</b>	Materials are suitable for bulk transport, securely wrapped on pallets.	
<b>Emergency and first aid procedure</b>		
<b>Skin contact</b>	Wash with water, prolonged skin contact may cause irritations	
<b>Eye contact</b>	Contact with eyes may cause irritations and should be irrigated with plenty of water	
<b>Ingestion</b>	Not applicable	
<b>Inhalation</b>	Not applicable
